 NEK AND NECK

Box play at Pall Mall. Prices as usual.

QUEEN'S THEATRE.
 SPECIAL NOTICE.
 Messrs. KEOGH & STEELE having secured the above
 Theatre until April, 1883, will be happy to treat with Stars, Com-
 ponists, or Specialties. (Signed) KEOGH and STEELE.

M. BURDETT HOWE AS MACBETH.
 The noble Marquis of Normandy has given several
 proofs of his claims to be considered a patron of the drama. His
 Lordship's box at the Royal Tyrone, in
 grand style, he took up more substantial amusement
 and on Friday last the Marquis gave a still more substantial proof
 of his favour by patronizing, jointly with the Marchioness, the
 Puffin Theatre, in the Haymarket.

Mr. Howe, shown on Friday night, his appreciation of the
 task entrusted to him, and at the same time, his own high talent
 as an actor, will be a source of great interest to the public, and a
 perfect triumph of tragic effort. He was frequently and loudly
 applauded, and twice called before the curtain.

Mr. HOWE solicits the patronage of the citizens of Sydney on
 the occasion of his

FAREWELL TO NEW SOUTH WALES,
 FRIDAY, JUNE 2, 1882.

POSITIONS HIS LAST APPEARANCE.

VICTORIA HALL.
 Lessee ... Mr. E. A. Hart.

LAST NIGHT OF THE SEASON.

COMPLIMENTARY SEAT OF MRS. E. A. HART,
 COMPLETE CHANGE OF PROGRAMME, GREAT SPECIAL
 BILL.

Come and see "DOUBLE DEALERS," To-night
 Come and see "DOMESTIC TROUBLE," To-night
 Come and see "GALVANIC TOMMY," To-night
 Come and see "THE HIGH-ROAD FLING," To-night
 as danced only by Mrs. E. A. HART, last night.

BENEFIT OF MRS. E. A. HART, TO-NIGHT,
 FRIDAY, JUNE 2, 1882.

Everything New. Nothing Old. Last Night. Last Night.

Lithgow Saturday, June 3d; Blayney, Orange, Wellington, and Dubbo to follow.

Admission: orchestra chairs, 2s; second seats, 2s; third
 seats, 1s.

R. F. ROPEL, Business Manager.

D. J. SIMONS. His unrivalled Physiognomist and
 Popular Speaker, will deliver splendidly illustrated and
 amusing LECTURES, at TEMPERANCE HALL, Pitt-street,
 on JUNE 2d, 1882. Each Lecture will commence at 8 p.m. Entertaining
 Popular Classes, &c., &c. The Healthful Character given
 daily, during the Lecture Course, in the Ante-room of the hall,
 from 9 a.m. to 5 p.m. The number of Portraits in
 Oil, Water-colour, &c., will be daily on view.

LOWTON PRESS.—The Pictorial World.—Dr. Simons is known
 as a most skilled practical Physiognomist. The Ministry and
 Medical profession, and the public, are well aware of the
 "exponent of physiognomy among living men." The Lancet—
 "It cannot be denied that the subject is of importance. Shrewd
 and forcible is the part of the author, and his book is a valuable
 paper."—Will amuse, instruct, and enlighten the mind and purify
 the affections."

NEWS BY THE ENGLISH MAIL,
VIA SUEZ.

The mails brought by the P. and O. Company's steamship *Peshawur* reached Sydney overland from Melbourne, and were delivered from the General Post Office, yesterday morning. The latest London date is April 21.

ENGLISH AND FOREIGN AFFAIRS.
(FROM OUR OWN CORRESPONDENT.)

LONDON, APRIL 21.

Notwithstanding the assertions of the Government and some of the Ministerial organs as to the improving position of Ireland under the operation of the Land Act, we are beginning to realize the fact that there is no ground for any optimist views with regard to the state of that country. On the contrary, it would be difficult to prove that the Ministerial policy has been aught less than a failure. The indications given by Mr. Gladstone and Mr. Forster of an intended change in that policy may be regarded as confirmatory of the opinions held by those who are inclined to look on the present state of the Irish administration with dissatisfaction. At the present moment, His Majesty's Ministers are engaged in reconsidering the situation. Two or three members of the Cabinet have been over to Ireland during the Easter recess, and, if we are to judge from the statements made by Mr. Gladstone and others in Parliament, there seems to be a general impression that before many weeks are over we shall have an announcement that the Government have decided on an alteration of the policy of the Land League. It is not easy, however, to see in what direction this change will be made. It is notorious that Mr. Forster has been urging his colleagues for months past to invest him with further powers of a repressive character. On the other hand, it is well known that there is a section of the Cabinet, headed by Mr. Chamberlain, and supported by the full strength of the Radical party outside, who are opposed to any increase of stringency in the ad ministration of Ireland. These persons would throw open the prison doors, and deal with the Irish people on a plan entirely differing from that which has hitherto been adopted. The best proof of the views they entertain on the subject is to be gathered from the line taken by the *Pall Mall Gazette*, in the one hand, and by the *Daily News* on the other. The *Pall Mall Gazette* not only finds fault with the Irish Executive, but even goes so far as to demand the recall of the Lord Lieutenant and Mr. Forster. When it is remembered that Mr. John Morley, the editor of the *Pall Mall Gazette*, receives much of his inspiration from Mr. Chamberlain, and that Mr. Chamberlain is known to have been seeking for the interest to be derived from a share in that paper—if, indeed, he has not already secured it—the course adopted by the *Pall Mall Gazette* becomes all the more significant. It is really the organ of a prominent member of the Cabinet, or of a section of the Government, its condemnation of the policy pursued by Mr. Forster is a clear indication of very serious divergencies of opinion in Downing-street. Unfortunately, for the arguments of the *Pall Mall Gazette*, the policy of Mr. Forster is the policy of the present Administration, the majority of whose members have spared no pains to declare, while Mr. Gladstone has mainly been exceedingly emphatic in asserting the responsibility of his colleagues for the policy pursued in regard to Ireland. The *Daily News* directs its attention chiefly to the necessity of recasting the whole of the permanent Executive in Dublin. There is a good deal of sympathy with this view among most Liberals, and the feeling is also spreading that the operation of the jury laws should be suspended, and that in the disturbed parts of Ireland offenders should be tried by a small commission of Judges, or that increased power in the infliction of summary punishment should be accorded to the magistrates. It is unquestionable that, so far as regards the suspects, a very definite opinion is being developed as to the prudence of setting them at liberty or bringing them at once to trial. It would be useless to place these men in the dock under the ordinary mode of administering the law; but it is urged that a special commission might be appointed to deal with these men alone. If, indeed, the functions of such a commission could not be further extended to the whole of the disturbed districts, it is exceedingly difficult to anticipate what course the Government intend to pursue. There are conflicts of opinion within the Cabinet as to the policy that ought to be adopted. One section is favourable to the release of the suspects or their immediate trial by a commission which shall exclude the resort to a common jury, while another section is in favour of removing the *Courier Act* and the introduction of additional restrictive measures.

While the Ministerial mind is thus wavering on this important subject, an opportunity is being afforded to the Opposition of which they have not been slow to avail themselves. The project for the creation of a peasant-proprietorship in Ireland is being rapidly developed, and Mr. W. H. Smith, who has undertaken to introduce a scheme for effecting this object, is now spending the greater portion of his Easter holidays in visiting some of the worst parts of that country. Much of the success of his proposal will depend, on the way in which it is intended to be carried out. The principle of peasant proprietorship has many friends among, in fact, that Mr. Gladstone might find it difficult to oppose a resolution in its favour, provided it had the full weight of the Tory support; but the misfortune is that in this particular case the Conservative party are suspected of bringing forward the intended motion with the real object of securing compensation to the landlords, for of course the State would have to be the purchaser of their interests—rather than for the benefit of the country at large. It is an easy matter to tell the occupiers of the soil that they ought to become the owners of their own farms, but the question demanding a practical answer is, how is this policy to be carried out? Are the landlords' interests to be appropriated wholesale? What is to be the purchasing price, and what steps are to be taken for securing the re-entry of the State? It is on questions such as these that the real value of the scheme which now finds favour with the Conservative party really depends. Lord Salisbury's recent speech at Liverpool throws no light on these subjects. It is merely said, in effect, that the condition of Ireland having been brought to its present pass by the policy of Mr. Gladstone and the Liberal party, he saw no better way out of it than that proposed by the scheme of Mr. W. H. Smith. There was a tone of reluctance traceable in his approval of this plan, and well there might be, should it be carried into effect, the precedent it would establish in the shape of peasant-proprietorship for Ireland might be fraught with very serious consequences to the landlords of England and Scotland.

The Salisbury speech at Liverpool have formed the chief political palladium of the Easter recess. The great bulk of the Conservative party had a good deal to say about the Irish policy of the Government, in addition to what they have above indicated, but they afforded no hint as to the character of the measures of repression he desired to see carried out, and saw the introduction of a system of martial law as the only alternative to which he only gave a reluctant support, he refrained from foreshadowing any points of a Conservative policy for Ireland. He spoke in defence of the action of the House of Lords, his remarks on this subject being evidently intended to answer the public criticisms levelled at the Upper Chamber for persisting in the appointment of a committee of inquiry into the operation of the Land Act. It is notable, however, that in dealing with this question he was careful to confine himself to the most commonplace observations in defence of the body to which he belongs, and that he refrained altogether from touching upon what is the real question, not perhaps of the hour, but which will certainly be brought forward for public discussion, if not for actual decision before many years are over, namely, the form of electing the House of Peers. He had not a word to say in defence of the hereditary system; and if there be one statesman more than another whose personal conduct and policy are calculated to induce in the popular mind a thorough scrutiny of the actions of the House of Lords, that man undoubtedly is Lord Beaconsfield the action of the leader of the Tory party has been the means of calling public attention to the question whether the hereditary principle ought not to be abolished. The noble lord was careful to avoid any remarks that might tend to the revelation of the skein in the Lord's cupboard, Sir Stafford Northcote, who was associated with Lord Salisbury in the Liverpool campaign, delivered a somewhat monotonous digression over the result of the closure debate—a lament

full of sighs for the perverseness of Radical innovation, and of wailing for the degeneracy of modern Liberalism.

The great event of the past fortnight has been the release of Mr. Parnell. The hon. gentleman asked permission from the Irish secretary to attend the funeral of a nephew who had died in Paris and promised that if set at liberty for that purpose he would, at the end of a period sufficient for the accomplishment of the object of his journey, return to Kilmainham gaol. Mr. Forster allowed Mr. Parnell to go at large upon parole, the duration of his temporary freedom to cover "ten days or a fortnight." The announcement of this step took the kingdom by surprise. Immediately it was known that Mr. Parnell was at liberty, and before the public could be informed of the cause, it was assumed that the Government had at length abandoned their policy of coercion. Illuminations were ordered, and in many parts of Ireland actually took place, before the mistake was made known, a general belief became prevalent for a brief interval that the olive branch was again being held out to the Irish agitators. Considerable disappointment was naturally experienced when the precise facts were published, and the Irish party were by no means pleased at Mr. Parnell's having asked a favour at the hands of a "tyrannical" administration; but the concession has done much, especially abroad, to convince political observers of the lenity of the British Government. What foreign Power, it may be asked, would have granted such a privilege to an arrogant leader, or would have been disposed to allow him any communication with the outside world? It is but just to Mr. Parnell to say that he has respected his parole to the utmost, and clung would-be newspapermen to the steps of his residence in Dublin. The finances of the country are certainly in a bad state, but up to the present moment they have been sufficient to cover the claims of the bondholders.

Mr. Patrick Egan, the treasurer of the Land League, in a letter to Mr. J. Hennessy Hinton, who, as an Australian Chamberlain, deeply regretted his inability to present, and expressed sympathy with Mrs. Barker.

In consequence of the state of Mr. Samuel's health, he could not attend the funeral, but he sent a letter to Mr. E. W. Woods, one of the executors, who accompanied with Mrs. Barker and the family in their larvae, and expressed his regret at not being able to attend the funeral.

AN AUSTRALIAN WINE COMPANY.

The Australian Wine Growers' Association, recently held in Washington, calling for a meeting of the 1st of June, to the amount of £200,000, of 1,000 shares of £50 each, with first issue to this country of 1,000 shares, the object being to promote and develop the wine industry of the Australian colonies, the promoters believing in the capacity of Australia to produce wine that can successfully compete in quality and price with the wine of any other country.

RESERVATION OF MEAT.

The Standard says:—"On the 8th of March last some sheep were killed after having been treated according to Jones' patent for preserving meat, and the flesh of one of these animals was found to be in a state of decomposition. The persons who had been endeavouring to sell themselves to some Australian betting men. The newspaper contains some sharp comments on this unpleasant incident, and general satisfaction is expressed at Shaw's having decided upon reporting the conduct of these persons to the Marylebone Club as well as to the Yorkshire and Nottingham cricket committees, with whose districts the offenders are said to be associated.

The next of kin, frauds in Manchester and Birmingham are alleged to have had some connection with Australia, where, it is said, the 'International Law Agency' had branch establishments. So far, however, it does not appear that these establishments did any active business, nor, indeed, that they had any existence beyond the statements of the importers who worked the frauds in England. The fees received by this 'International Law Agency' sometimes amounted to as much as £50 a day—a tolerably lucrative business.

Last Wednesday was the anniversary of Lord Beaconsfield's death. The prime minister was a favorite flower with the departed statesman, and consequently a great many of his friends and admirers wore primrose buttons in remembrance of the great Conservative leader, just as the Imperials of France are accustomed to make poison of the violet on the anniversary of the day on which Louis Napoleon breathed his last in the prison of the Chateau of Saint-Cloud, in the French Republic. This desire is now at its best in all our fields and hedgerows, and large quantities of its beautiful yellow blossoms which were imported into London for the occasion met with a ready sale. Before leaving this subject I may mention a curious fact in the history of floralular decorations. It has recently become quite the fashion among the wealthier classes to embellish their dinner tables with flowers, not as one has hitherto been accustomed to see them, in pots, vases, or plates, but in dense masses, completely covering with one particular 'room,' every part of the table not otherwise appropriated by the plates, glasses, and other articles placed for the immediate use of the guests. A few weeks ago at a dinner given by the Marquis of Bath to the Prince of Wales the main area of the table was converted into a bed of primrose-spangled moss, for which display no fewer than four and twenty thousand blossoms were used to cover the surface. The result was a most perfect and safe compound, but perfectly safe was not perfectly safe. A compound has been employed for some time past under the name of aspergins for the preservation of milk. But those who used it did not consider it quite innocuous. A farmer of the Crown farms states that he kept a certain quantity of the aspergins in his stable, and that the horses would not eat it, and a resolution was passed commanding the process as being economic and humane, and as affording a prospect of security from the importation of infectious diseases."

"Professor Hart's discovery (says the *Home News*) of the valuable qualities of boracic acid in the treatment of the skin affords us no perfectly safe compound, but it has been employed for some time past under the name of aspergins for the preservation of milk. But those who used it did not consider it quite innocuous. A farmer of the Crown farms states that he kept a certain quantity of the aspergins in his stable, and that the horses would not eat it, and a resolution was passed commanding the process as being economic and humane, and as affording a prospect of security from the importation of infectious diseases."

"Professor Hart's discovery (says the *Home News*) of the valuable qualities of boracic acid in the treatment of the skin affords us no perfectly safe compound, but it has been employed for some time past under the name of aspergins for the preservation of milk. But those who used it did not consider it quite innocuous. A farmer of the Crown farms states that he kept a certain quantity of the aspergins in his stable, and that the horses would not eat it, and a resolution was passed commanding the process as being economic and humane, and as affording a prospect of security from the importation of infectious diseases."

Nothing so comfortable, warm, and useful.
DAVID JONES AND COMPANY.
LADIES' WATERPROOF CLOAKS.
DAVID JONES AND CO. have a superb and perfect rain-mantle either with Hood or Cape.
GUARANTEED NOT TO STICK.
DARK OLIVE, NAVY BLUE, BLACK.
WEIGHT not heavier than an Ulster.
Prices, 42s to 62s each.
DAVID JONES AND COMPANY.
REAL DOWN QUILTS.
WHY DESIRABLE?
For the following reasons:-
ECONOMY—They are the cheapest form of Bed Clothing.
LIGHTNESS—Weighting only 10 lbs.
DURABILITY—Will last twenty years.
BEAUTY—A great ornament to a room.
PURITY—Are made of flax or musl, and can be washed whenever desired.
DAVID JONES AND COMPANY hold a large variety in various sizes.
FIRST AND FINEST QUALITY, by
Messrs. BOOTH and FOX.
SECOND AND EXCELLENT QUALITY, by
Messrs. MCLINTOCK and CO.
DOWN DRESSING GOWNS are light, warm, and durable.
DOWN PETTICOATS, weighing but a few ounces, are warmer than several flannel skirts, much softer and easily washed.
